**Subject:** Microsoft Settlement

To the people listening to us out here:

Please hear my voice too, I am an american citizen and have been following the entire microsoft trial since the beginning with very personal interest. It reminds me so much of my classes long ago on busting up antitrust moguls of long ago, like Bell Telephone or Rockefeller or the railroad barons and its is so important.

Please hear my voice: Its time for this example to be closed now, and settled. Enough time and effort and opinions and money have been spent; I'm sure everyone has learned as much as they can, and any further pounding on Microsoft is going to be ignored as the world moves on and has all its attention on the current war we are in and the recession. It is time to close this down and settle it and move on ..Im sure, looking at the history of this country, that there will be more Microsoft companies in the future to use as examples, but this lesson has been learned and its time is over!

Thanks for your time and attention. US citizen Borden B. Stevens, San Clemente, CA.
